

Managed Azure Overview.

Our 18-year relationship with Microsoft has led to Microsoft Expert MSP, Advanced Specialisations and Gold status across multiple focus areas.

Take control of the cloud

Azure might seem simple, but it is continually changing. With more than 37,000 service options, it suits millions of businesses of varying sizes. Finding the right fit takes valuable time, energy and other resources. How do you know you're getting the absolute most out of Azure's labyrinthine potential? Do you have the people power to make sure you are? That's why we're here to help. With Managed Azure from Macquarie Cloud, you get the benefits of the public cloud with the backing of Australia's most recommended managed cloud provider. Combining best-of-breed technology and highly skilled people, our team is ready to meet your hybrid cloud needs. It's the best of both worlds.

Accelerate your Azure journey

Safe, swift, seamless migration means you won't lose time moving to Azure. And then you'll have 24/7/365 support, with a guaranteed ticket response time of 15 minutes, when questions or issues arise – as well as complete visibility over your billing and account.

You've got bigger things to do than get stuck in the cloud

Our expert, continual oversight of your Azure ecosystem means you won't need to waste your time and resources on upkeep. We'll take care of updates, optimisation, compliance and certification, freeing up you and your team to take care of other vital business.

Local support you can count on

We're right here, not over there. Our team and hosting services are based in Australia, so there's less risk. We've got your back, and we're right around the corner if trouble arises. Speed, reliability, flexibility and security – it all adds up to Azure Managed Services that let you operate at your worry-free best.

Azure service capability.

Service Summary

Managed Azure

Service Model

Full support with proactive 24/7 monitoring and support; rebate backed service management, mission critical, complex and dynamic environments.
