CLOUD SERVICES

Work anywhere. Stay secure everywhere.

Give your people secure access to the internet and SaaS applications, wherever they work, with Managed Global Secure Access by Macquarie Cloud Services.

Work happens everywhere now. Your people are logging in from home, heading into the office and getting things done on the road. Wherever they are, they need fast, secure access to the internet and the cloud applications they rely on.

Managed Global Secure Access keeps that access protected without routing traffic back through the corporate network. You can apply consistent security controls wherever people work, while giving them a faster, easier way to connect.

Macquarie Cloud Services manages it for you, helping you protect your people and data without adding more complexity to your environment.

A better way to secure hybrid work.

Your people need the freedom to work from anywhere without leaving security behind. Managed Global Secure Access gives them secure access to the internet and SaaS applications, with the same protection wherever they connect.

Work securely from anywhere

Give people the same protection whether they're at home, in the office or on the road.

Connect directly, no detours

Give users fast, secure access to the internet and SaaS applications without routing traffic back through the office.

Stop threats before they get through

Block malicious sites, malware and command-and-control traffic wherever your people are working.

Keep apps and data in check

Stay on top of Shadow IT and prevent sensitive information leaving your organisation.

Act when a device is at risk

Use conditional access policies to restrict access when an endpoint is infected or compromised.

Cut the complexity

Replace ageing proxy and secure web gateway appliances and reduce your reliance on multiple security tools.

Secure access and protection, wherever you work.

Work happens everywhere now, so your security needs to keep up. Your people need fast, secure access to the internet and SaaS applications whether they're at home, in the office or on the road.

Managed Global Secure Access keeps that access protected wherever people connect, without sending all their traffic back through the corporate network. Managed XDR works alongside it, monitoring for threats 24x7 and responding when something goes wrong.

Together, they give your people the freedom to work from anywhere, backed by the protection and support of Macquarie Cloud Services.

Managed Global Secure Access

Keeps people protected wherever they work.

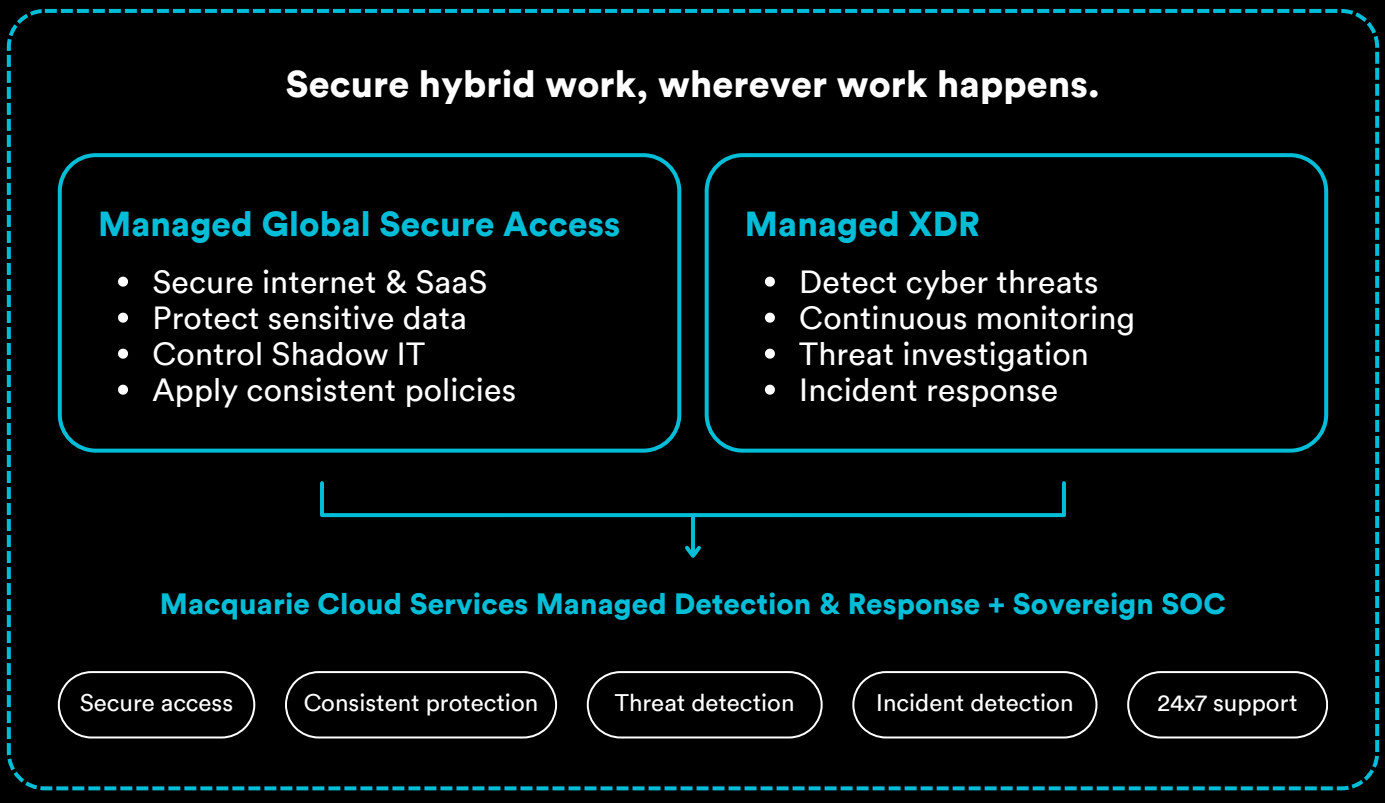

- Secure internet and SaaS access
- Apply the same security policies everywhere
- Control Shadow IT and unsanctioned apps
- Protect sensitive data from leaving the business
- Respond to endpoint risk with conditional access

Managed XDR

Keeps watch for cyber threats 24x7

- Detect and respond to cyber threats
- Continuous monitoring from our 100% sovereign SOC
- Investigate suspicious activity and incidents
- Respond quickly when threats are identified

Together, they give your people secure access wherever they work, backed by 24x7 threat detection and response.
