macquarie CLOUD SERVICES

Microsoft Partner | Azure Expert MSP

Make your data work harder.

Your data is already spread across Microsoft 365, your databases and dozens of spreadsheets. Microsoft Fabric brings it together in one place for reporting, analytics and AI. And for a limited time, eligible customers can save up to 20% on Fabric for their first six months.

We'll help you plan and build a platform that's delivering value before the discount ends, so you get the most from every discounted month.

20%

Save up to 20%

on Microsoft Fabric capacity for six months, when you start by 30 April 2027.

The offer.

Discount
Up to 20% off Microsoft Fabric capacity on pay-as-you-go

How long
Six months, starting the day the offer is activated

Start by
30 April 2027

How to get it
Through Macquarie Cloud Services as your Microsoft Cloud Solution Provider. There's nothing to set up in Azure; we activate it for you.

Who qualifies.

New Fabric customers with 50 or more Microsoft 365 Business Premium, E3 or E5 licences

OR

New Fabric customers using Azure databases such as Azure SQL, PostgreSQL, MySQL or Cosmos DB

Microsoft confirms final eligibility. We'll check yours for you at no cost.

Why Microsoft Fabric.

Fabric gives your organisation one trusted source of data, so people spend less time finding and fixing numbers and more time acting on them.

One place for all your data	Connect Microsoft 365, databases and business systems into a single, governed data layer.
One version of the truth	Power BI reports draw from the same data, so every team works from the same numbers.
Ready for AI	Copilot and AI tools are only as good as the data behind them. Fabric gives them clean, secure, well-organised data.
Built on what you already own	If you use Microsoft 365 or Azure databases, Fabric connects naturally to the tools and security you have today.
Pay for what you use	Pay-as-you-go capacity means you can start small and scale up as you see results.

Still running SQL Server on-premises?

Eligible customers moving on-premises SQL Server workloads to Azure can save up to 30% on Azure database services for six months. That includes Azure SQL Database, Azure SQL Managed Instance and Azure Database for PostgreSQL and MySQL.

It's a timely option if you're still on SQL Server 2016, which is now out of support. Modernise your databases first, then add Fabric for analytics, and we'll make sure you get the best available discount at each step.

Save up to

30%

on Azure database services for six months

How we help.

Switching on Fabric is easy; getting value from it takes a plan. We guide you from first conversation to a platform that keeps delivering value.

Data Discovery Workshop

We map your data sources, reporting challenges and priorities, and agree the two or three use cases that matter most to your business.

Design

We design your Fabric environment: the right capacity size, security, governance and a first use case to deliver.

Activate and build

We activate your discount as your platform goes live, then deliver your first use case within the six-month offer period.

Manage and grow

Our Managed Data Platform keeps your environment secure, governed and cost-efficient, and we review your usage before the discount ends, so there are no surprises when standard pricing applies.

The result:
A data platform designed around your business, with your first six months at a discount.

Terms
Offer provided by Microsoft and available only through Microsoft Cloud Solution Provider partners. Offer availability, eligibility, pricing and benefits may vary and are subject to change or discontinuation without notice. Final eligibility and offer availability are determined by Microsoft. Discount applies to Microsoft Fabric capacity on pay-as-you-go only. If multiple offers apply, the best available discount is applied automatically; discounts do not combine on the same usage. Promotional pricing applies only after the offer is activated and ends when the six-month promotional period expires, after which standard pricing applies. The offer must be claimed by 30 April 2027, 11:59 PM UTC.

Next steps.

Don’t leave it late. The offer must be activated by 30 April 2027, and a well-planned platform takes a few weeks to design.

Check your eligibility
We’ll confirm which offers you qualify for today.
